

Custom Sweeping Service's Philosophy of Street Sweeping Excellence Means:

Industry-Leading Methods, Training and Procedures

- High quality service delivered in a consistent, dependable and knowledgeable manner.
- Ongoing education and training by both management and employees to keep company methods up-to-date with the latest Best Management Practices as well as with local, state and federal regulatory information.
- We are committed to being leaders in the industry as a top echelon sweeping company, always at the forefront of industry methodology, equipment and information.

An Outstanding Level of Service

- We sweep in an established manner, and at the times specified by our contract. This way, if you have a parking control system that requires cars to be moved, your citizens will have a minimum amount of disruption.
- Because we use the latest technology of regenerative air sweepers for our street sweeping customers, Custom Sweeping eliminates most of the 'fines' typically left by mechanical broom sweepers. This provides a Best Management Practice to allow better compliance with stormwater runoff permits, as well as a safer, more healthy environment for your citizens.

Use of Innovative and Late Model Equipment

- We maintain our sweepers so they will perform to manufacturer's OEM specifications. This ensures they will provide optimal performance on your property, and do so with minimal mechanical malfunction.

Motivated Employees

- Employees of Custom Sweeping Service are motivated to perform at a high level.
- Our ongoing professional training programs enable us to offer the most thorough and reliable service procedures available.
- Our employees are proud of their company and their work. You'll see this enthusiasm reflected in their service.

Professionally serving Terre Haute since 1978. SM
